**Subject:** REPORT FOR TOE STOPPERS

Dear Adrian,

Firstly I would like to congratulate you and your team for such a wonderful product. I'm sure you have saved many lives, ranging from children at Pony Club to Experienced riders at all discipline levels and now with the introduction of the TRACK Toe Stopper. WOW!!!

I am an ex- Jockey who had to give up my profession due to a series of bad race falls, one which I was dragged by a young horse, and don't remember much. I was also dragged twice when riding Trackwork, once on a young horse at a barrier trial which spooked and dumped me at approx the 800m mark and I was dragged 500mts, I ended up with a fractured collar bone and a severe sprained ankle, If I had Toe Stoppers this would not have happen.

Now I use Toe Stoppers in every aspect of my riding, from breaking in young horses, competitive and now track work riding again. It took my a long time to work up the courage to throw my leg over a race horse again, but now my confidence has returned due to the Track Toe Stopper. Thank You.

#### **Benefits of the Track Toe Stopper**

- Confidence
- Balance
- Correct riding position
- No fear of getting feet caught up
- Your feet don't slip in stirrups when it is wet
- When riding a horse that pulls you have much more balance and strength to hold the horse
- They aren't bulky
- They don't get in the way when your in the barriers
- You can use them in any weather
- Hands and heels riding is a lot easier, Because your not worried about your feet slipping and they are easy to attach to your stirrup

#### **Disadvantage of the Track Toe Stopper**

- The only one I can come up with is that they are not compulsory. It takes me longer in the mornings now when riding track work, I have to use my exercise pad on every horse which takes up a lot of my time because not all of the trainers have Toe Stoppers, or even the 4 ¾ stirrup irons so I just take my pad off with my Toe Stoppers and use them on there's.

In conclusion I am a true believer in the Toe Stopper and will always use them; I have successfully converted numerous riders to the Toe Stopper. Since the very first time I used my Toe Stoppers to now I haven't fallen off, and my riding technique has improved. Thank You for your wonderful invention, and Thank You for the continuing Safety I and all of my family and friends have now due to the Toe Stopper.

Yours Faithfully

*Jodie King*
