What do you like about Toe Stoppers?

They keep your feet in the right position on the stirrup, which in turn helps to keep your overall position more correct over the fence.

Do you know of a rider who has been hooked up or dragged? Please briefly mention the incident.

Yes, not so long ago I saw a junior dragged at a show after her horse stopped and spun around, causing her to fall off to the side with one of her legs still in the stirrup. Luckily she was o.k.
