Re: Toe Stoppers Report

To Whom It May Concern:

I have been using Toe Stoppers at track work and race day when possible. I find them to be comfortable, keeping your feet very secure in the irons giving you better stability and balance and also making it easy to release your feet from the irons when required

After using the Toe Stoppers I believe them to be an important safety device especially for track work where there is a high risk of riders getting their feet caught in the irons.

To be able to use Toe Stoppers on all race rides there would need to be a weight allowance.

Sincerely,

Rodney M Quinn
