To Whom It May Concern

I have recently become acquainted with "Toe Stoppers" technology by Intelligent Inventions, Inc. I am extremely impressed with the fact that in utilizing this equipment, no rider should ever be dragged again. It is apparent to me that this technology is saving many lives, and this is the reason why I would like to strongly suggest to any rider, or to parents who allow their children to ride, to utilize this technology. I wish you all the best of luck in making the whole world acquainted with this technology that makes all riders much more safe.
