MY TOE STOPPER TESTIMONIAL

I think that toe stoppers should be worn by all pony club children. I am a pony club instructor, and last year I attended a pony camp.

Of all the children in my daughters troop (approx 8 riders), Brianna was the only one whose feet were correctly positioned in the stirrups. This was due to the toe stoppers.

You will appreciate that in her age group (the youngest riders at the camp) the children are not very experienced riders. I find that using the toe stoppers enables the foot to be held in the correct position within the stirrup.

The other young kids had their feet pushed forward with the stirrup iron lodged against their heel. I also find that the toe stopper is attractive, and does not detract from the riders appearance at shows.

Since we have been using the toe stoppers (approx 2 years), other children at pony club have begun to use them. I have been very happy with the product.

Regards,

Donna Wilson
