Dear Adrian,

RE: Compulsary use of Toe Stoppers

I have worked in the Racing Industry for the past 10 years in the capacity of stable foreperson. Recently i have obtained my Trainers license on the Gold Coast, Queensland, Australia.

I was introduced to the Toe Stoppers recently by a fellow trainer and was very impressed with the product. Duty of care is essential in the work place and I am of the belief that it's only a matter of time before Toe Stoppers are made compulsory use in the racing industry.

As of today I am taking the extra initiative of putting Healthy and Safety first throughout my racing establishment by making Toe Stoppers compulsory use for trackwork riders. I believe that by making this decision it will prevent serious injury or death should a rider happen to become dislodged and dragged.

Kind Regards,

Danniella Farrell (Trainer)
