Re: TOE STOPPERS

Dear Adrian,

I have been brought up around the horse racing industry all my life and worked for 3 years with Multiple Premiership Winning trainer Mr John Hawkes. I am currently training horses in Rockhampton, Queensland.

I was introduced to the award winning safety product Toe Stoppers by a fellow trainer I was really impressed with the product and the company DVD and have taken initiative immediately and made Toe Stoppers compulsory use for all trackwork throughout my stable believing that this product will prevent serious injuries should a rider happen to become dragged.

I do not ride trackwork myself but the trackwork riders using Toe Stoppers on my horses are very happy with them.

I hope other trainers around Australia take extra responsibility and strongly consider making Toe Stoppers compulsory use for all trackwork riders.

Yours Sincerely

Ben Crear (Trainer)
