Report on Toe Stoppers

To Whom It May Concern,

I have been using the product Toe Stoppers for three weeks and think they are a great invention for safety purposes in the horse racing industry, I would highly recommend them to anyone riding horses.

I have been dragged twice and received multiple injuries including a serious knee injury and concussion, which I feel could have been prevented had I been using the Toe Stoppers.

All jockeys should be given a weight allowance to use Toe Stoppers in races as there are race falls everyday and anything that can prevent serious injury or death should be made compulsory.

Yours truly,

Darryl Ward
