Re: TOE STOPPERS

I Gary Stewart have been working with horses for over 30 years both as a jockey and trainer, during my time as a jockey I was fortunate enough to ride Multiple Group One winners in both Australia and New Zealand including the Coveted Cox Plate and the Australian Cup aboard the great "Boncrusher". I have also won a Hong Kong Cup aboard Our Grey Invader and also ridden winners in Macau and Japan.

After riding with Toe Stoppers I have found them to be very comfortable, practical and necessary aid to reducing the risk of injury or death to any rider that may happen to become dislodged from the saddle and become dragged should their foot become entangled in the stirrup iron.

I have been dragged before and fortunately for me my foot was only released out of the stirrup iron as a result of my ankle breaking. I believe the use of "Toe Stoppers" would have prevented this terrifying experience and ensuing injury.

I have purchased Toe Stoppers for my daughters aged 7 & 10, as I feel they are a necessary safety precaution. They are also an aid in correct foot positioning particularly for the inexperienced or people learning how to ride.

I totally recommend the use of Toe Stoppers, I have no doubt they improve safety whilst riding a horse and should be mandatory for everyone who ever saddles up..

Yours Sincerely

Gary Stewart
